Subject: ROC with Susette Bagneris Re: 3400 Lowerline Removal Action

Chris, Ms. Bagneris contacted me regarding concerns with the subject location. She stated that radium 226 had been placed in containers at the site, but had not been removed. She also stated that a community meeting was conducted for this site, this past Monday, but no one from EPA or LDEQ was in attendance, although she says the newspaper suggested EPA and LDEQ staff attended this meeting.

Ms. Bagneris identified herself as an attorney, representing New Orleans citizens in this area. I explained that I was not the correct contact for her to follow up on her concerns and said I would try to find the appropriate person to follow up with her. Presuming you are the appropriate contact for this site, please contact Ms. Bagneris at 504-810-3995.

Thanks.
